

# LLyfrgell Maindee Library Catering Recording Forms

It is essential that the outcomes of checks / monitoring procedures are recorded at a frequency that reflects the nature of our business. Similarly, when checks / monitoring reveal that procedures have not been followed you must also record what you have done about it (corrective actions). Recording helps you to keep an accurate check on food safety procedures within our business and enables us to demonstrate that we are controlling hazards in an effective manner.

## What paperwork is needed?

Your monitoring checks must be recorded on the relevant Monitoring Record Forms. Copies of these forms are held in this folder or online at:

<http://www.maindee.org/uploads/library/maindee-library-safe-catering-recording-forms.pdf>

## Which of the Recording Forms provided should be used?

The records provided, if correctly used, will help you to meet and support the requirements of a Food Safety Management Plan based on the HACCP principles and demonstrate it is working effectively.

Forms 1-4 may be typically replaced with Form 8

\*A 'clean area' is a room or an area within the food premises where only ready-to-eat foods are handled. No raw foods can be handled here. The clean area might be fixed in the same location on a permanent basis or may be set up on a temporary basis following a thorough cleaning and disinfection process of the entire area. A temporary clean area should include clean storage facilities for storing equipment and packaging when the temporary clean area is not in use.

\*\*Complex equipment is the term given to those items of equipment that can be very difficult to clean. This may be because it is hard to access all parts of the equipment or because it is made up of a number of small parts and surfaces which may not be smooth or easy to clean. For these reasons complex equipment provided for use on ready-to-eat food should not be used for raw food.
