# Maindee Library Arts Residency Project

These sketches have been put together in response to Maindee Library and Maindee experienced over the past 3 years. I have considered its past, present and its role for the future.

- Texture – matt and shiny, few that are soft, some leaves
- Colour – is subtle a little dull, observants will see colour everywhere
- Light – illuminated from above and from the sides
- Pattern – grids and bricks with lines connecting with vegetation
- Sound – cars and chatter with laughter at times, shouting at times
- People – a cultural landscape of diversity, some soft, some hard
- Projects – that have established the journey
- Place – in flux, mapping / observing a change, mostly good, some affect sensibilities
- Space – has a new purpose, as well as a past

My designs have been created by what I have seen, experienced and that has inspired.

# Concept designs

These designs are visual concepts

Selected materials, patina and process will illuminate their significance to the space.

The involvement of others will create the texture and stories that will be revealed

This project is a residency - Dates 13th- 30th June including Saturdays

I wish to work for 3 weeks on site to explore the potential of these included concepts.

Working with volunteers and other artists to include an archive of the journey so far at Maindee Library. To observe and respond to the past, present and future use of space, in place and its people.

Materials mosaic including ceramic and glass, glass formed cases, memorabilia, paint stripping product or man power, found objects, fabric, broken crockery.

I would like to share and discuss these design concepts with you all and make together.

# Pathways and archiving

# Fabric and softening

# Sound and movement

# Shafts of light

# Rejuvenating and enhancing

# Play with street layouts

# Revisiting Place
